#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 50-53 and 61 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 19848370.

There is disclosed in the German reference a coffee machine, comprising: a housing 2; an upper supply part 9 on the housing; a lower supply part 4 movable relative to the upper part between an upper position and a lower position; a container 8, 14 to hold a charge of coffee grounds and fittable with the lower supply part; guide means on the housing and container including a slide 15 and a pivot 12 for displacement of the container between a coffee-making position and a loading/emptying position, the container being separable from the housing, the guide means including a non-straight guide 10 along which the slide is displaceable; and a supply means 20, 33 connected through the upper supply part, the supply means including a valve 20.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/510,613

Art Unit: 1761

Claims 62 and 63 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 19848370 in view of Axelsson et al.

Axelsson discloses that it is known to have a supply means including a valve, the valve having a hollow valve body, a piston slidable therein, and annular outwardly open grooves formed on the piston.

It would have been obvious to one skilled in the art to substitute the valve of DE 19848370 with the valve disclosed in Axellson, to provide greater control of the flow of water to the supply means.

### Allowable Subject Matter

Claims 54-60 are allowed.

Claim 64 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

Applicant's arguments filed 15 August 2007 have been fully considered but they are not persuasive. Applicant argues that the German reference ('370) fails to disclose four features presented in claim 50. In regards to the container being "seperable" from the housing, it is apparent that with a complete dis-assembly of the device the container can be separated from the housing. In regards to the relative movement of the upper and lower parts with respect to each other, the container is part of the lower part and therefor the upper and lower parts are movable with respect to each other. In regards to the slide, while the reference fails to disclose the features of applicant's slide as shown

Art Unit: 1761

in the drawings, it does disclose a member which can read on the slide as claimed. In regards to the addition of water only in the coffee making position of the container, such is an operational step and provides no structural limitations to the claims.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reginald L. Alexander whose telephone number is 571-272-1395. The examiner can normally be reached on Monday-Friday.

Application/Control Number: 10/510,613

Art Unit: 1761
